Title	Test Purpose	Pre-requirements	Step Number	Step	Expected Result	Actual Result
A second item can be purchased after first (British money)	This test is to ensure, when credit is available, a user can purchase a second item after buying the first	The tester must have access to the vending machine noted in the requirements, this machine should be powered on and set up as expected in a user facing environment. The machine should have no current monetary balance.	1	Insert £5 into the machine	Vending machine acknowledges the input and raises the available balance to £5	
			2	Purchase an item with a value less than £5	Vending machine gives the item to the user and reduces the credit available buy the price of the item. This new credit is then shown on the screen e.g. The item is £3, the screen shows £2 credit remaining	
			3	Purchase another item with the credit remaining	Vending machine gives the item to the user and reduces the credit available buy the price of the item. This new credit is then shown on the screen e.g. The item is £3, the screen shows £2 credit remaining	
A second item can be purchased after first (European money)	This test is to ensure, when credit is available, a user can purchase a second item after buying the first	The tester must have access to the vending machine noted in the requirements, this machine should be powered on and set up as expected in a user facing environment. The machine should have no current monetary balance.	1	Insert €5 into the machine	Vending machine acknowledges the input and raises the available balance to €5	
			2	Purchase an item with a value less than €5	Vending machine gives the item to the user and reduces the credit available buy the price of the item. This new credit is then shown on the screen e.g. The item is €3, the screen shows €2 credit remaining	
			3	Purchase another item with the credit remaining	Vending machine gives the item to the user and reduces the credit available buy the price of the item. This new credit is then shown on the screen e.g. The item is €3, the screen shows €2 credit remaining	

Additional info :
* The additional item test can be repeated as above with as many items as deemed necessary with a large first amount e.g. 3/4/5 item multibuy
